

PRODUCT NOTIFICATION

IRIS Readers & Software Supporting the New MyKad with Enhanced Biometric Access (EBA)

Notice Date: 2 March 2018

With effect from the notice date stated above, the IRIS readers, BCR200DTP and ST5 Series (ST5, ST5e, ST5ex), are able to support the new MyKad with EBA. The latest MyKad, scheduled for issuance by Jabatan Pendaftaran Negara (JPN) from March 2018, will feature additional security features as further protection against unauthorised access to biometric data on the embedded chip.

IRIS has worked closely with JPN to ensure that our readers can read both existing MyKad and the new MyKad with EBA. The readers shown here have undergone testing, using test cards provided by JPN, for biometric verification on both MyKad versions. CyberSecurity Malaysia (CSM), appointed by JPN to conduct and facilitate compliance testing and certification of MyKad readers, is currently developing a new Technology Security Assessment (TSA) towards the issuance of compliance certification in the near future.

Replacement Products/Product Migration Pathway

IRIS is committed to assisting and providing support to ensure that your existing obligations are fulfilled and that your future needs can be met.

Hardware

Users of readers and devices other than those listed are encouraged to migrate to the **BCR200DTP** Series or **ST5 Series** of devices. Kindly refer to our Sales representatives for a device migration plan customised to your needs and objectives.

Software

For users of **BCR200DTP** Series or **ST5 Series** devices, you are encouraged to upgrade your software application. Kindly refer to our Technical Support team or Sales representatives for further discussion.
